No tugging
your tarp in
cold weather!

Fact:

Extang makes
the world's
only patented
4-way fully
adjustable
tonnos that
work well in
cold climates.

ENGINEERED TO BE SUPERIOR:

- The ultimate quality choice when nothing but premium metal components will do.
- Exclusive and patented all-weather tarp design that's fully adjustable 4 ways for easy use in cold weather.
- New "SpringLock™" bows - easy to install and they'll never fall off.
- NO drilling, NO damage!
- Fast and easy access to truck bed & cargo by simply dropping tailgate or by rolling up the tarp.
- One-handed tail rail quick release with the patented "ClickLock™" corner system.
- "SnapStopper™" keeps snaps on the rail when tarp is rolled up for bulk hauling.
- The "TuffSnaps™" stainless steel and brass snaps will not break. Field tested & proven.
- Easy, fast installation within minutes (no tools needed).
- Famous Extang engineering, quality workmanship and excellent customer service.
- Industry's best warranties.

 Warranty

Your tailgate easily opens with tonno installed.

PLATINUM FEATURES HIGH QUALITY HEAVY DUTY METAL COMPONENTS

Corners securely attach

An easy pull disengages your tail rail for bulk hauling. To resecure: slide and click, your tail rail is locked in place. You'll be impressed

CLICKLOCK™
 CORNER SYSTEM

with CLICKLOCK's high quality spring loaded stainless steel ball bearings that click into place with such a satisfying feel.

Tarps designed for strength & good looks

Corners don't buckle up due to parachute grade nylon corner reinforcements. Snaps & corners

are backed with thick polymer forcing the corners and edges to lie smooth and look good in any weather. The thick polymer edging also keeps your snaps from ripping out!

Quicker installation

TUFFKLAMPS™
 Our TUFFKLAMPS™ simply drop into the rail channels (works well with bed liners). Easy on. Clamps tight.

The Best Warranty

Ten year tarp and lifetime frame—the best in the industry. Longer than most folks will own their truck! It's more than enough coverage.

Snaps are your tonno's most important part

MAXSNAPS™

Fiberglass reinforced nylon formula makes the BlackMax's snaps strong and durable.

Tested and proven under intense usage for years in the lab and field. Extang's patented "MAXSNAPS™" will not break.

SNAPSTOPPER™

Extang's SNAPSTOPPER™ is a small detail that means a lot. Roll up your tarp and the snaps will stay on

the rail.

Bow height adjustment

Extang's Monster Bows™ quickly spring on and off with no tools. It's fast and easily done with one hand. The TUFFKLAMPS™ allow two bow heights: HIGH for maximum water shedding in harsh weather, and for improved gas mileage. LOW for sporty good looks and cold weather tonno attachment.

Extang makes the ONLY tonnos that work well in cold climates

- Stud low for tight fit in hot weather
- Slide off, flip over, then slide on again
- Stud high for looser fit in cold weather

Protect it!

It cleans, beautifies and protects tonnos in 1 step! Powerful UV protectant that is formulated precisely for our tonno material. Tonno Tonic is the only vinyl cleaner and conditioner approved for use on Extang Tonnos.

3 QUICK, EASY STEPS FOR BULK HAULING:

1. Roll up & secure your tarp

Your tarp can be quickly rolled up and secured with strong convenient straps allowing you to haul large items.

2. Click out tail rail

New "LeverLock™" corners allow you to attach or remove your tail rail instantly. No tools or screws required. "LeverLock™" corner attachments firmly hold your tail rail in place.

3. Remove your Monster Bows™

Extang's MONSTERBOWS™ have been designed tall and wide making them super strong and are easily removed with one hand.
